

OB-AWS Aircraft Warning Sphere

Aircraft warning sphere is designed to provide daytime visual warning or night time visual warning; comes with reflective tape, for electricity transmission line and overhead wire for aircraft pilots, visual warning for river crossings or high voltage transmission lines.

Power line marker ball is made of high-grade Fiberglass Reinforced Plastics(FRP), diameter of 600mm and 800mm are available to meet different customer's needs.

Compliance

- ICAO Annex 14, Volume I, 6 Edition, July, 2013
- Conforms to FAA AC70-7460-1K

Features

- Lightweight and high strength.
- High grade fiberglass reinforced plastic material.
- Die casting aluminum cable clamp.
- Corrosion resistant and no fading, have a more than 10 years lifespan for outdoor use.
- Good in heat insulation.
- Water drop holes on the ball in case ponding.
- Stainless steel mounting hardware.

Application

- High transmission power line
- Cross river high voltage transmission lines
