

## YOL100 LED Based Low Intensity Obstruction Light

Yuan sheng YOL100 LED Low Intensity Obstruction Light series is a 100cd (candela) LED light designed for airway fixed obstacle marking application. It comply with ICAO & FAA regulation. It shares the same mechanical design with YOL10, but comes with high power LED. Use constant current LED driver IC, Compared with similar products, constant flow effect is good and the service life is longer.

### YOL100 Series

Intensity	100cd, steady
Compliant with	ICAO: low intensity type B
	FAA: L810
	DGAC Mexico

### YOL100 series double light

Double light is integrated by 2 single lights. For making sure there is always a light working atop of the tower. Two optional working patterns can meet different area's customers.

- "Service+Standby": Only "service light" is working normally. It will auto-transfer to "standby light" in case of "service light" failure
- "Service+Service": Two single lights work simultaneously. Either failure will not affect the other normal working.

### Features

- LED light source ensures long life time, maintenance free
- Low power consumption
- Shock and vibration resistant
- Corrosion resistant and UV stable polycarbonate housing
- Ease of mount, mount accessories available
- Available both in single and double type
- 5 years warranty
- Special optical design provides better light distribution

### Application

- Telecomm tower
- Radio tower
- Wind turbine
- Smoke stacks & chimney
- Tall building
- Crane
- Power transmission line

### Standard

- ICAO Annex 14, 4th Edition, July 2004
- ICAO low intensity, type B
- FAA AC No. 150/5345-43F, 2006
- FAA type L810
- DGAC Mexico

### APPLICATIONS

buildings

tlc towers

power lines

wind turbines

chimneys

flare stacks
