

product features:

- 1) vane -type lighting , applicable to all types of airports observation wind conditions , in daytime and at night, at the top of an LED light source installed red obstacle lights at night to provide obstacle warnings for pilots .
- 2) The benchmark product in the upper portion of a light- weight stainless steel air bag frame and a 360-degree horizontal rotation bearing mechanism installed. The outer periphery of floodlighting .
- 3) The product on the air bag frame installed a wind bag, air bags for the corrosion-resistant, high temperature resistant nylon material of UV resistant material , long service life. Air bags with orange and red color (orange) and white to choose from .

4) Technical parameters :

Product number

YS-FXB

Item Specifications

Specifications

power input

AC: 100V-250V

Power frequency (Hz)

50-60

Rated Power (W)

≤30

Wind Bag Color

Orange or red (orange) and white

Wind Bag length

1.2m

height

2m, 3m, 4m

Maximum design wind speed

260km / h

Protection class

IP65

Lightning Level (V)

≤1400

Ambient Temperature (°C)

-40 ~ + 55

environment humidity(%)

0 ~ 95

Structural materials

304 stainless steel
